

Significantly Perturbed Genes in Clear Cell Renal Cell Carcinoma

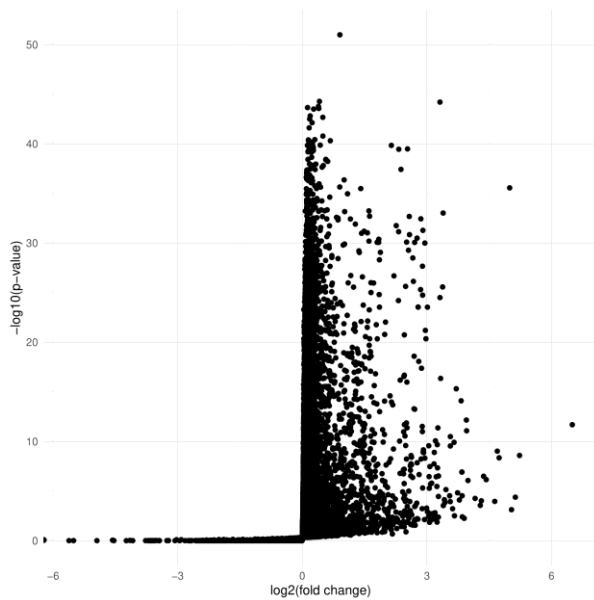

Significantly Perturbed Genes in Endometrial Carcinoma

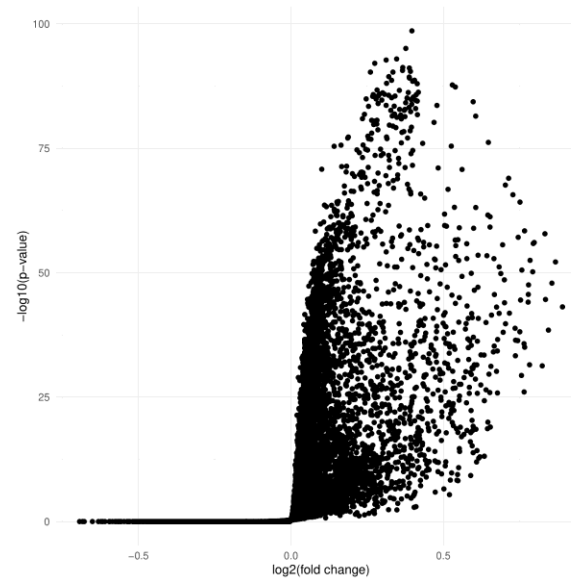

Significantly Perturbed Genes in Glioblastoma

Significantly Perturbed Genes in Head and Neck Squamous Cell Carcinoma

Significantly Perturbed Genes in Lung Squamous Cell Carcinoma

Each graph in Figure 1 uses fold change and the p-values from one sided t-tests between control and tumor samples to show which E3 ligases and target proteins are over-expressed in the five cancer types included in this study.
